

ABRASION SLEEVES

Hi-Tech Webbing Sleeves

Kooper Sleaving

Lay Flat Hose

SpanSet protective sleeves are designed to lengthen the life of flat webbing and round slings. They protect against abrasion and dirt ingress and are generally permanently attached to the sling, though some are removable.

- They are not for cut protection, in which case secutex® sleeving must be used
- Hi-Tech Webbing Sleeves: Heavy duty sling webbing is used for high abrasion applications.
- Kooper Sleaving: Light weight with a smooth abrasion resistant surface.
- Lay Flat Hose: Light weight PVC moisture resistant hose.
