

MIG - WITH C PINS

Instant mounting and positioning on any part of the chain.

- Shortening in either chain direction; up-down.
- Designed to prevent inadvertent chain disengagement.
- Firm mounting with locking set on any desired part of the chain with one chain direction open for shortening.
- Close-open function in both chain directions for safe retention of the chain.
- Can be set idle on the chain leg when shortening is not required.

CODE	CHAIN	WLL (tonne)	WEIGHT (kg)	DIMENSIONS (mm)
