

## SKYRAIL HORIZONTAL RAIL SYSTEM

SKYRAIL is a horizontal fall protection system, which allows people to

work at great heights. The system can be used, for example, on flat roofs, stadium roofs, loading plants, wind turbines or cranes.

Attached

to floors, walls or ceilings, maintenance work and other activities can be

carried out safely with the SKYRAIL system.

Users can attach themselves easily to the SKYRAIL RUN using their Personal Fall Protection Equipment (PFPE) and move freely along the

rail without stopping. The high-quality, architectural appearance of the system will fulfil all your design requirements. A choice of colour

scheme allows the SKYRAIL to blend in with the building.

- The materials used are resistant to particularly aggressive conditions, such as constant or repeated immersion in seawater or in areas where there is seawater spray, chlorinated atmospheres in indoor swimming pools or in atmospheres with extreme chemical pollution.

- The system is supplied with a small number of components.

- Simple installation, which may be carried out by SKYLOTEC certified fitters.
